sachin-hadimani.is-a.dev github.com/Sachin-Hadimani linkedin.com/sachin-hadimani

PROFESSIONAL SUMMARY

Full-Stack Developer with **2.5+ years** of experience in web application development, specializing in React.js, TypeScript, JavaScript and Java Spring Boot. Skilled in building scalable web applications, reusable UI component libraries, RESTful APIs, backend services and database integration using MySQL and PostgreSQL. Experienced in **micro-frontend** architecture, state management, complex form handling and application development.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Radix UI

State & Data: Redux Toolkit, RTK Query, React Hook Form, RESTful API Integration

Backend: Java, Spring Boot, Node.js, Express.js, REST API design and integration

Databases: PostgreSQL, MySQL, MongoDB

Architecture: Micro-Frontends, Event Bus, Shared UI Libraries, Design Systems

Tools: Git, GitHub, Postman, VS Code, Claude Code

PROFESSIONAL EXPERIENCE

EGDK

Junior Software Developer | March 2025 - Oct 2026

- Built a shared UI component library using Radix UI primitives. **Reusable components** (tooltip, multi-form stepper, modal, button, table, select etc) adopted in new feature development to improve consistency and accelerate development.
- Developed automated energy-consumption reports for **European users** and supported **scheduled report delivery**(month, quarter, yearly, once).
- Built complex automated-report **multistep forms** with **React Hook Form**, including validation and form-state handling(**15+ Fields**).
- Implemented an **event bus** to share common data between **2 micro-frontends**, enabling cross-MFE communication.
- Took ownership of the release process, managing deployments across **4 enviorments** development, staging, canary, and production environments.
- Used **Claude Code** with repository-specific skills for feature development and a **custom PR-review agent** aligned with repository architecture and team rules.

VIS Networks

Junior Application Engineer Nov 2022 - Oct 2023

- Contributed to **IVR-based** banking application workflows, including account balance inquiry and customer interaction flows.
- Worked on web-based monitoring dashboard concepts for displaying activity metrics.
- Contributed to frontend development using React.js, focusing on data presentation and dashboard interfaces.

EDUCATION

2023 - 2025 | St Aloysius College of Management and IT, Mangaluru

Master of Computer Applications (MCA)

2019 - 2022 | Government First Grade College, CarStreet, Mangaluru

Bachelor of Science - Computer Science
