ABOUT

MCA graduate with a Bachelor's in Computer Science, currently working as a frontend developer using **React.js**. Experienced in micro-frontend architecture, custom UI libraries, and modern frontend tooling, with prior backend experience in **Java**

Experience

Junior Software Developer | EGDK

Mar 2025 - Present

Responsibilities:

- Implemented new features, including an **Alarms module**, within a **micro-frontend architecture**
- Built and maintained a **custom UI component library** for shared and reusable components
- Used **Tailwind CSS**, **RTK Query**, and **React Hook Form** for modern UI and state management

Frontend Developer Intern | IR-INFOTECH

SEP 2023 - Dec 2023

Responsibilities:

- Designed and implemented user interfaces using React.js . Gym flow management system.
- Developed reusable React components to standardize the design and accelerate development

Junior Application Engineer | VIS Networks

Nov 2022 - Oct 2023

Responsibilities:

- Designed and developed frontend applications using ReactJs
- Worked with **MySQL** and integrated **REST APIs**.

Projects

AC Sales and Service (Bliss Expertise)| MongoDB, Express.js, React.js, Node.js

- Created features for customers to view service details, including expiry dates, pricing, and booking history.
- Implemented separate modules for customers and admins, enabling role-based access for managing services, bookings, and sales.

Energy Management System(EMS)| React.js

- Implemented monitoring and **alarm-related UI features** to highlight abnormal energy usage
- Built interactive **charts and graphs** to visualize real-time and historical energy data for trend analysis
